## An Architected, Automated Enterprise Budget Management System

Budgeting doesn't have to be a painful process. iforea™ is the most cost effective solution to manage and automate your budget. No spreadsheets, no arcane or complicated budget software, and no guessing games. Move to a cloud-based, secure, and dynamic enterprise budget system that delivers defensible budgets from reliable numbers. From pre-configured cost models to built-in sustainability and ROI calculations, iforea™ enables the instant integration of cost to complete estimates and schedules on an enterprise scale.

Based on more than 15 years of federal budgeting experience, iforea™ provides a flexible solution to enable rapid budget preparation. It uses advanced modeling capabilities to estimate costs with minimal input, project future requirements, track sustainability metrics, analyze "what if" scenarios, consolidate requirements across the enterprise, and align budget expenses with feedback into the cost models for experienced-based refinement.

### SOLVE BUDGETING CHALLENGES

- Align your budget with your enterprise strategies
- Quickly refactor budgets based upon agency and strategy changes
- Rapidly prepare budgets (bottom-up and top-down)
- Manage program execution through workflow processes

iforea™ offers an ideal solution to accelerate your agency's audit readiness, as well as a stronger foundation for sustainable financial management. Using iforea™:

- Satisfies the requirements of GAO's Federal Financial Management Improvement Act (FFMIA) and FISCAM (Federal Information System Controls Audit Material), and represents a modernized financial management system that generates "timely, accurate, and useful information with which to make informed decisions and to ensure accountability on an ongoing basis" (FFMIA)
- Ensures timely, accurate, relevant, and complete information by seamlessly integrating with your enterprise's systems to incorporate relevant data into enterprise budgets for a comprehensive view of project expenditures and obligations
- Supports your business environment with sustainable, traceable, auditable, and repeatable processes
- Maintains documentation related to financial transactions, such as commitments and obligations – and makes data retrievable in a timely manner
- Offers an architected solution with the ability to integrate into your enterprise

**Transform your enterprise with the cloud-based, secure, and dynamic budget system that provides sustainable, bottom-line results**
